The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by modifying Class D airspace, Class E surface airspace and Class E airspace designated as an extension to Class D surface area, at Kenai Municipal Airport, Kenai, AK.

Also, the geographic coordinates of the airport would be updated to coincide with the FAA's aeronautical database. After biennial review of the airspace, the FAA's Aeronautical Products Office found modification of the airspace necessary for the safety and management of aircraft departing and arriving under IFR operations at the airport. The Class D airspace and Class E surface area airspace excluded below 1,100 feet MSL beyond 4 miles from the airport would be decreased, and the segment of the Class E airspace designated as an extension extending to 10.2 miles northeast of the airport would be adjusted to coincide with the dimensions of the cutout.

Class D airspace and Class E airspace designations are published in paragraph 5000, 6002 and 6004, respectively, of FAA Order 7400.9W, dated August 8, 2012, and effective September 15, 2012, which is incorporated by reference in 14 CFR Part 71.1. The Class D and Class E airspace designations listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation; (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify controlled airspace at Kenai Municipal Airport, Kenai, AK.
